Graphing the tangent function

November 1, 2026

1. Starting from the graph of $\tan(x)$, use transformation functions to graph

$$\cot(x/2)$$

2. List the asymptotes of the transformed function, and the intercepts

3. On a new graph, graph

$$\frac{1}{\sin(x/2)}$$

   Explain how s graph is related to the cotangent graph above.
